7:00 PM
Williamsport, PA

Council Vice President Eric Beiter brought the Williamsport City Council meeting to order on Thursday, February 15, 2024 at 7:00 PM.at Trade & Transit Center II, 144 West Third St, Williamsport, PA. This meeting was duly advertised in the Williamsport Sun-Gazette.

Council members present:
Adam Yoder, President
Eric Beiter, Vice President
Liz Miele, Councilwoman
Randy Allison, Councilman,
Vincent Pulizzi, Councilman
Jon Mackey, Councilman,
Bonnie Katz, Councilwoman
Absent:
Adam Yoder
Jon Mackey
Elizabeth Miel

Also, Present:
Derek Slaughter, Mayor, absent
August Memmi
Sam Aungst, Fire Chief,
Justin Snyder, Police Chief absent
Solicitor Austin White absent
Janice Frank, City Clerk
Scott Livermore
Kris Black absent
Heather Jacoby
Cynthia Hart, HR
Members of the public

Approval of the Williamsport City Council minutes for 02/01/24 were approved upon a motion **by Mr. Pulizzi and a** second from **Mrs. Katz. All were in favor. The vote was 4 to 0. Mr. Mackey, Ms. Miele and Mr. Yoder were absent.**

Limited Courtesy of the Floor
There were none.

Mr. Beiter changed the order of the agenda.

Resolution #9739
Resolution Authorizing Amendment 1 to Work Order 7 between WSP & City for additional Services

The City Clerk read the resolution.
Mr. Beiter asked for a motion and second
Mr. Allison made the motion and it was seconded by Mrs. Katz.

Mayor Slaughter What you have before you is a resolution for amendment to the work order for support services for the levy as we all know we've been working on this for a long time. We've been going back and forth with Army Corps and PEMA and FEMA and this is additional work that the Army Corps, we have been working with Army Corps and FEMA. They did request it. Weare back to the SQRA process. Once again, we started down that path. We paused it for a little bit for the Army Corp request and now we have restarted it for the Army Corps' request. So with the restart of the SQRA, it is obviously more work needed and that they need. With WSP's assistance. I believe are Taylor is on the meeting as well and can provide technical answers to your questions if there are any. This was reviewed in public works.

Mr. Allison The conversation center had around the SQRA, which is semi quantitative risk assessment. Which is an investigation of the levy in part or in whole to see what possible risks there are with areas. And as explained to us initially the Army Corps required a more focused look at some areas. And everything seemed fine at this point. That was the initial money we had allocated for that. And then, subsequently, as these things happen, with the levy, the Army Corps came back and said, no, we're going to need the pull risk assessment. So we're adding money to the project, to the contract, because more work has to be done in order for us to stay on track and have all our Is dotted and Ts crossed. We have seen this happen, Bonnie, for several years. Since we've been dealing with the levy. And it is just a function of working through with different -- we have, the Army Corps, FEMA, PEMA, and those all have to be coordinated because they all have different viewpoint on what they want inspected or what have you. So in any case, this one is all about adding money for more work that has to be done for
risk assessment.

Mrs. Katz : Where is the money coming from? Do you know?
Mayor? Do you know where the money is coming from?
Mayor : Yes. The $75,000 due the budget process that the administration City Council allocated for the levy, so act 13 allocation that we have$175,000 for the levy. Yes, this is only 92,000, I believe, for this one. That's all that's needed for this one, correct.
Mr. Pulizzi : In case anyone is wondering why we are spending more, and Gaz, I know you're on the line, and feel free to correct me if I'm incorrect, this additional SQRA, this is required for us to update our storm water ordinance. And as a stipulation, that is also necessary. So to update the information that we have so it makes the city eligible for some government funding to assist us for the levy.

Gaz Councilman, if I may correct you slightly, I wouldn't say this is tied to your storm water ordinance. Although your storm water ordinance is maybe something we review in the future for interior drainage. But it is a step in the process towards justifying federal funding and federal projects. So in step 2 of the process of getting everyone on the same page to acknowledge the risk and to justify the project and to be able to attain those federal funds is the goal, really, and staying in this program and quantifying those risks to satisfy the Army Corps.

Mr. Pulizzi : Thank you very much for that correction. Forgive me. My notes ran together on my paperwork.
Gaz That is quite all right. Yes.

Mr. Pulizzi : Long story, short, we have to do this.
Mrs. Katz : Yes, would it be possible to get – we have been working with you for 12, 13 years? And is it possible to get a printout of how much we have spent for the engineering part for your company. We've got through name changes and so many other things with the levy. And also different administrations here. I think, you know, it would be great for all of us if we actually knew what all has been spent.
Gaz Sure, we can update that. I know I have provided it at times in the past. So I can go back in and provide a latest update. Would you like that to include the under seepage design, relief well design recently awarded as well?
Mrs. Katz : Yes, I do. Yes, I would.
Gaz Okay, yeah, absolutely. If you can give me a couple weeks to get everything together, including the latest, and make sure that I got you everything, then I will be happy to deliver that to the council.
Mrs. Katz : Thank you so much. I know it'll be a long process. We have been going back 12, 13 years with this. We haven't shoveled dirt yet.
Gaz Yes, that is definitely a big challenge. What we want to make sure we do, is if there is money spent to shovel dirt we want to make sure that takes you into the future. And that it doesn't just meet an old standard that is no longer considered valid, right? And that's where some of these programs are coming into place, is to get everyone on the same page as to what should be done when they break dirt. And you know, what everyone could agree on. So I respect the need to want to do work. I agree. That the most important part, is to improve the system.
Mrs. Katz : Thank you very much, Gaz. Would have been nice to see you.
The Resolution was carried with four yes roll call votes. The vote was 4 to 0. All were in favor. Mr. Allison voted yes, Mr. Pulizzi voted yes, Mrs. Katz voted yes, and Mr. Beiter voted yes. Mr. Mackey, Ms. Miele and Mr. Yoder were absent.

Subdivision – Tri County Realty LLC

Mr. Beiter asked for a motion and a second.
Mr. Allison made the motion and it was seconded by Mrs. Katz.
Mr. Knarr What I have before you tonight is a request for one lot subdivision request from Tri County Realty LLC. It is located 3500 west fourth street. The current land use is a warehouse facility with off street parking. It is located within the CC and ML zoning district. The proposed plan is to sub divide the 7.39 acres with a one-lot subdivision. Lot number one will contain .978 acres for future development which we will discuss next. The residual containing the warehouse facility will be 6.8522 acres. Both parcels will have access off of west fourth street and have water and sewer services provided by the Williamsport water and sewer authorities. The plan was reviewed by the county planning and make positive recommendation for your approval. Do you have a copy of their comments. The comments provided by the county have already been currently addressed. And will be ready for your positive recommendation. The city planning commission reviewed the plan and made positive recommendation with the condition that an easement access be approved by city, by city solicitor and recorded with the plan. That ease many access was reviewed by Austin white and he gave his blessings off on that. And once City Council provided City Council approves this, the easement will be signed off on and all will be recorded an deeded at the courthouse so both easement as well as subdivision. I do have representatives here. And I can answer any questions.
Mr. Beiter : Thank you very much, Mr. Knarr. Any questions of council?
Mr. Allison : Gary, the county planning review, were all their concerns met?
Mr. Knarr Correct. They had been addressed. I do have the approved DNS plan from the conservation district. Again, easement. Added stuff. Some minor cleanup of the plan itself. They had been set and they are sitting in the office of the county planning providing that council approves them, restamp them. Everything has been addressed and met requirement zoning of one-lot subdivision.
Mr. Beiter : Anything else from other members of council? Mrs. Frank?
The Sub division was carried with four yes roll call votes. The vote was 4 to 0. All were in favor. Mr. Allison voted yes, Mr. Pulizzi voted yes, Mrs. Katz voted yes, and Mr. Beiter voted yes. Mr. Mackey, Ms. Miele and Mr. Yoder were absent

Dollar General – Land Development

Mr. Beiter asked for a motion and second.
Mr. Pulizzi made the motion and it was seconded by Mrs. Katz.
Mr. Knarr What I bring before you is land development request from Pentex ventures, real estate development company. It is located, that new address based off of the subdivision that have you will be 3528 west fourth street. The current land use obviously is a vacant lot. It is located again within the CC and ML zoning district. Proposed plan is to construct a dollar general store of 10,640 square feet with off-street parking. Doll general will have an easement access off of west fourth street based off of the subdivision you just approved. The proposed development will have sewer and water provided by municipal suiter authorities, well served letter has been served and I have that as part of the record. The plan was reviewed by city engineer, Eric Smithgal of storm water authority and approved plan dated January 4, 2024 approved by county conservation district. I do have that. The plan again reviewed by Lycoming County planning making positive recommendation. Same comments. Those comments have been addressed. City planning commission reviewed it and made positive recommendation with the condition that a buffer area along the western part of the parcel be created. What that is for is because you have a commercial business there and then right next to it there are two homes, a home or two that is there. In order to do, we felt that basically putting that commercial neck to a residential in zoning does require a buffered area. And with that, again, because it is in the commercial zone, we request that the buffer area be put in there as a condition for approval. And Ben is here representing Pentext ventures and they agreed to that.So therefore, everything has been met and is before council for your approval. Hopefully I didn't confuse you.> In the future when I show you presentations like that, I will have that -- the

overlay of the area as well as shaded area that will be land development or subdivision.
Mr. Beiter: Any other questions by members of council?
Mr. Pulizzi: I have one. And I only ask this because some of our council members are present tonight. So for their benefit, because I know they've want to know, are there enough trees? Or will there be enough trees? This development? : Green space, shrubbery.
Mr. Knarr Again, it does meet zoning, land development plan. And part of that area that will be buffered will be probably some sort of shrubs. Normally in any land development we require them to meet that criteria. As you do note, county had not commented that it didn't meet it, so it does meet the criteria. So land development and 1793 of landscape ordinance.
Mr. Pulizzi: Thank you.
Mr. Beiter You can hear that, Liz?
Mr. Pulizzi I think we all knew who I was asking for.
Mr. Beiter. All right The question I have, with plans we have before us, and given the not so cookie cutter nature of these stores, a few years ago the store placed on Washington boulevard, the facade of that was done in a very tasteful way. Is there plans to make this a different design? Is it going to be standard metal front? How is that going to look? Has that been reached yet?
Mr. Knarr I don't believe it has been reached. Ben, you can address that. Is it going to be the standard -- you can come up.
Mr. Beiter : Understand. I think you put the cart before the horse. Just curious what it will look like.
Mr. Knarr Once this plan is approved, they will bring before me the building permit application and that time, I will – it won't be brought before you providing it meets zoning requirement else and building code. But I will advise you of renderings of what the proposal will look like.
The land development was carried with four yes roll call votes. The vote was 4 to 0. All were in favor.
Mr. Allison voted yes, Mr. Pulizzi voted yes, Mrs. Katz voted yes, and Mr. Beiter voted yes. Mr. Mackey, Ms. Miele and Mr. Yoder were absent

Presentation – New Business
> Good evening, everybody. I am Marco Colbert, the owner of patriot mobile auto body and detailing. What I would like to present tonight is a possibility to expand my business into a detail shop in Williamsport. You guys have this packet here. It will show one thing, and that is that I'm a five-star business owner with very good reputation. Impeccable work. And work ethic.On the second page, it is going to show a building that I've rejuvenated in the borough of Muncy. I like to say on the outside it looked like a crack house, because it did. The brick was exposed, no paint, no electrical, no water. There was nothing. It was a shell.
I came in and put state of the art epoxy floors in. Painted all of the walls. Updated LEDs. Whole nine. However, it is actually at the point now where it is getting in the way of my YouTube business. One day, not to get into a tangent, on the pressure washer one day and I put this tire shine instead of soap and got silicone over the whole back half of the shop. Which basically I decided at that point, time it build a detail shop because trying to basically in that shop, it is a YouTube studio. One you see in this picture right here. It is a YouTube studio. And I also do minor detailing work in there as well.
I would like to build a separate facility just dedicated to detailing. As far as mobile auto body business, that is a business where I go out and I have a body shop basically in my trunk. I paint bumpers, fenders, quarter panels. I have fixed bullet holes. Done pretty much everything right in the parking lot. That is my main business. And then but I was also looking to expand into a detail shop on 515 arch street.I have already secured the property. I paid out of pocket for it, cash. It is a great property that I believe the City of Williamsport has, nobody has done anything with it in the past decade. It sat vacant. It is tax liability, meaning it is not giving any tax liability to the city. I came to you tonight because seeing past two presentations, it is possibly something that will come to council to get voted on, to be built. I have no idea as far as zoning. I don't want to get cart in front of the horse. I don't know anything about the zoning nature. But I want to get to this type of facility. Now if you turn to, I believe, the last page, that will show you a prospect of what the building will look like.Don't know why other boroughs and cities an all these other counties an stuff like that aren't taking advantage of it right now but metal is down, down like down water down the drain. It is probably reduced in price by about 50% and that's the way I would like to go. That building right now is quite frankly a peanut compared to what it was in COVID. They look good when done. They look good when built properly. You can get them painted whatever color you want. And I believe it will be a very good addition to the city, business wise, prospect wise. So just didn't know if anybody had any questions about what tI'm presenting.
Mr. Beiter: I believe you did a very good in summarizing what it is you're looking for. And it is a great place to get started. As you saw, just a few minutes ago, Mr. Gary Knarr will be a great resource for you to communicate with more. As you mentioned, that property being on arch street, 515 arch street is directly across from the Odark building, over in the Newberry section of Williamsport. Not quite into Jaysburg but still Newberry .And has been vacant for a number of years. Right next to the harvest moon restaurant gas station as well. There is an apartment building that sits between the two parcels. So if there is anything, what I would say, on a final note from my perspective, that you need council's help for, that youreach out to us and we can direct you to the proper resources. Again, Mr. Knarr being one of the most important.
Maarco . One thing I will present as a new business owner coming into town, present/ask, does any of the City Council, including the mayor, does anyone have the talks about deregulation when it comes to infrastructure and business? Does anybody have that type of a conversation?
> Deregulation. Meaning, lightning up the walls on new infrastructure, making it easier for business owners to come in and build and have businesses.
Mr. Beiter : Currently our city treasurer, Kevin Mackey, is working on programs for that and will be presenting next ERC meeting. Which would be in two weeks. February 28. Which I would welcome you to come to that meeting. It would be at 9:00 in the morning on Wednesday. And you can ask any questions regarding that then.

Marco > Yeah. And Kevin, I have actually already spoken to Kevin. Kevin talked about a lot of grants that you've got, which I believe are incredible. Which you guys are trying to do. Grants and tax cuts for new businesses coming into town. Hey, first year, whatever you put on it, you know, a hundred percent, it is a wash. Great. Love that idea. What I'm talking about is old phony and corny regulations when it comes to buildings and infrastructure. Just to give you of an example, I'm in Muncy. Any new structure that is built, they have some pretty outrageous regulations when it comes to building.I will give you guys the insight, and I believe you know what I'm going it say, what business owners are looking for is deregulation. You guys are running a lot of programs to get new business owners to come in. Deregulation is really going to be the key. What I'm -- I'm not saying everybody just buy property and no permits and no nothing and everybody is going to put up horse barns. I'm not saying that.But some of the infrastructure laws, and I've done a lot of study of that, a lot of though laws that come from 90s and early 2000s are extremely phony. And I would suggest that City Council and the mayor and everybody take a good look at that. When you guys begin to not fully deregulate, we aren't making the city of Williamsport lawless, but when you deregulate and scale things back and make it easier for business owners to come in, we will come in full swing .And Janice has been extremely welcoming. She was like the first or second person I called. She has been extremely welcoming. Everybody has been extremely welcoming. It has been a good experience so far.But that would definitely be my recommendation as a business owner is to get things going with deregulation with certain infrastructure and old laws and take a look at some of those coming off the books. Anybody have any other questions for me?
Mr. Beiter : I appreciate you being here this evening.It means a lot that you are willing to invest in the City of Williamsport. I welcome you to attend our ERC meeting on the 28th. We can get more into the weeds, if you will. With some of the concerns that have you. I will ask if Mr. Knarr is available, he could potentially be there as well, and hopefully we can hear a lot more from you then. What I understand Mr. Mackey has on his agenda, yes. And some potential programs. But we don't have the agenda yet and we don't have too many details.
.

Ordinance – Amending Transfer Ordinance #10 (final reading)
The City Clerk read the ordinance.
Mr. Beiter asked for a motion and second.
Mr. Pulizzi made the motion and it was seconded by Mrs. Katz.
Mr. Knar Good evening, members of council. What you have before you is Transfer Ordinance number 10. This is the final reading of this. Basically, what happened is there was a typo and we have a new surplus, 89,347, I believe. So this is the final reading. Nothing has changed since the last meeting. Do you have any questions?
The ordinance was carried in final reading with four yes roll call votes. The vote was 4 to 0. All were in favor.
Mr. Allison voted yes, Mr. Pulizzi voted yes, Mrs. Katz voted yes, and Mr. Beiter voted yes. Mr. Mackey, Ms. Miele and Mr. Yoder were absent

Ordinance ARPA Transfer Ordinance #13 (final reading)
The City Clerk read the ordinance.
Mr. Beiter asked for a motion and second.
Mr. Pulizzi made the motion and it was seconded by Mrs. Katz.
Mr. Livermore Good evening, again, Vice President Beiter and members of council. What I present to you is a second reading of ordinance amendment number 13, which basically, I believe council added several other transfer item orders. The primary one, obviously, is from transfer from public safety
from the ARPA funds to for a copier for the department and in addition there is transfers from recreation contingency from ARPA in order to fund ways garden, lows park community garden, future projects and levy system. All added to the Transfer Ordinance and hopefully I can answer any questions
The ordinance was carried in final reading with four yes roll call votes. The vote was 4 to 0. All were in favor.
Mr. Allison voted yes, Mr. Pulizzi voted yes, Mrs. Katz voted yes, and Mr. Beiter voted yes. Mr. Mackey, Ms. Miele and Mr. Yoder were absent

Ordinance Amending Part 15 Fire Prevention Code Article 1521 Fee Schedule (first reading)
The City Clerk read the ordinance.
Mr. Beiter asked for a motion and second
Mr. Pulizzi made the motion and it was seconded by Mrs. Katz.
Chief Aungst Before you is an ordinance amending the fee schedule under the fire prevention code.
What we're requesting is to add a CP or updating the fee schedule to include the CPR and first aid training.
There is some costs associated with that that we need to address. And then there is also an update with the company, third party company who does the billing for vehicle accidents, those kind of things.
So it has been a while since this has been updated .It was brought before the public safety committee and also reviewed by Austin.
Mr. Pulizzi : We discussed this. And really at its core, what we need do is amend this ordinance because, to my understanding, is that the fire department is expanding beyond just our normal municipal boundaries to provide CPR services to other businesses, other entities outside of our area and as such we need it update fees and filing and schedule and fees to providing services. It is absolutely great we are getting out there providing the training to other businesses. Making sure everybody is training on how to stay safe. It was a good discussion.
Mr. Beiter Anything else from other members of council?
Mrs. Katz : Chief, can you explain, or can you say fees also go through an insurance --
Chief > Yeah, third party company. And there's been a few hiccups. Especially recently.

That you and I discussed on Monday. But normally, they are to bill the insurance company, go through the insurance company to recoup some losses, such as a vehicle accident, those kinds of things, that are used during incidents.
Mrs. Katz : So with the fire, what is that covering? The insurance with the fire site?
Chief With that, each insurance policy has a certain amount that is budgeted or that is included in their policy. And that is to go to the fire department to recruit those losses and that's what we're seeing.
Mrs. Katz : Oh, for anything in the department? Is that what you are saying? To cover those expenses? Over the course of the fire.
Mrs. .Katz : Okay. Now I understand. Because I didn't understand whether this was for the vehicle or the home or whatever. It is to cover all those other expenses which is coming out of your budget.
The ordinance was carried in first reading with four yes roll call votes. The vote was 4 to 0. All were in favor.
Mr. Allison voted yes, Mr. Pulizzi voted yes, Mrs. Katz voted yes, and Mr. Beiter voted yes. Mr. Mackey, Ms. Miele and Mr. Yoder were absent

Resolution # 9740
Resolution Fire Grant 2023

The City Clerk read the resolution.
Mr. Beiter asked for a motion and second.
Mr. Pulizzi made the motion and it was seconded by Mrs. Katz.
Chief Okay, before you is a resolution to accept a State Fire grant. This is an annual grant that we received from the fire Commissioner's office. They did increase the amount to $20,000 as the maximum. I found out today in a meeting that there is a new formula because of a number of different reasons they came up with a formula to come out to the amount that we received. We received $16,951.99. Multiple departments received similar amounts. This grant ,there is no matching funds that go along with it. It is just a grant that is provided.
Mr. Beiter Are there any restrictions what this money can be used for?
Chief When you submit for the grant, there are, you do have to put, to submit a budget. So for us, what we are looking at is replacing the flooring at fire headquarters. And that amount was, I believe, $13,581. And also, painting the interior of fire headquarters .And that amount came out to, I believe, $6,573. So, the painting would be performed by streets and parks.
Mr. Pulizzi They couldn't charge us less? Streets and parks? They couldn't charge us less?
Chief No, so there is no labor cost that is associated with that. But they do have, there were some stipulations that if you were to use a company, it has to be a licensed with the state.
Mr. Pulizzi : No. We have discussed it. Everything we touched on tonight, we touched on on Tuesday.
Mr. Beiter : Any other questions from members of council?
Mr. Allison : Just so I have this straight, the grant is for 16,000?
Mr. Allison : How do we make up the difference to the20,000?
Chief So we've got to be a little creative. When we expected to receive the full 20,000, our budget, I believe, came out to $20,054 or $154. So we do have some money in the capital budget that we would be able to reallocate towards that.
The resolution was carried with four yes roll call votes. The vote was 4 to 0. All were in favor.
Mr. Allison voted yes, Mr. Pulizzi voted yes, Mrs. Katz voted yes, and Mr. Beiter voted yes. Mr. Mackey, Ms. Miele and Mr. Yoder were absent

Resolution #9741
Resolution Authorizing Payment to Motorola Solutions

The City Clerk read the resolution.
Mr. Beiter asked for a motion and second
Mr. Pulizzi made the motion and it was seconded by Mrs. Katz.
Chief Good evening, members of council. This resolution is simply for payment for outstanding invoice for outgoing records management systems, owned by Motorola in the amount of $34,955.85.
These are charges that were incurred for the year 2023 and budgeted through our contract of services line item. Original invoice was about $49,500. And through the course of the year our I.T. staff worked with Motorola to bring that down. We removed about $14,600 from our bill to get it down to $34,900. These were all functions we weren't using and things that had no functionality any more. As you know, we are moving to a new records management system. So hopefully this year we will be able to stand down spillman and move fully over into the new enforce records management system, which is now utilized by most of the municipal police departments in the county.
This was also reviewed by public safety.
Mr. Pulizzi : Good evening. This is spot on. The funds for this were, I believe, he had it right down to the line item, line item 79100. : Of the budget. This money was allocated in the budget for that. And I was very happy to hear we were able to reduce some expenditures in exactly the 14,600. And with this implementation of eforce it does create a lot of continuity now that a lot of, a majority, of the other municipal police departments within the county are either going to or have already gone to.
Chief Yes. Currently right now we are all in the phase of getting our servers up and getting trained. The only one that is now live currently is the county police department, Lycoming County attorney's office because they don't need the functionality that every other department needs with 911 center.
Mr. Pulizzi : So it'll be very beneficial for all police departments within our county now that we are getting on the same universal system. Nothing further.
Mr. Beiter : Any other comments from members of council? Seeing hearing none.
The resolution was carried with four yes roll call votes. The vote was 4 to 0. All were in favor.
Mr. Allison voted yes, Mr. Pulizzi voted yes, Mrs. Katz voted yes, and Mr. Beiter voted yes. Mr. Mackey, Ms. Miele and Mr. Yoder were absent

Accept for filing

Controllers Report November 2023

Public Works 03/29/23

WMWA & WMSA 12/20/23

Mr. Beiter asked for a motion and second to accept the minutes for filing.

Mr. Pulizzi made the motion and it was seconded by Mrs. Katz.

The minutes were accepted for filing with four yes roll call votes. The vote was 4 to 0. All were in favor.

Mr. Allison voted yes, Mr. Pulizzi voted yes, Mrs. Katz voted yes, and Mr. Beiter voted yes. Mr. Mackey, Ms. Miele and Mr. Yoder were absent

Announcements

. The next regularly scheduled City Council meeting will be held on Thursday February 29, 2024 at 7:00 PM, Trade & Transit II, 144 West Third St. 3rd Floor, Williamsport, PA.

Upcoming Meetings:

Tuesday, Feb 20	6:30 PM	HARB
